

GRADUATE DEGREE: COMMUNICATIONS & INFORMATION SYSTEMS (MS)

Master of Science (M.S.) in Communications & Information Systems

The Master of Science in Communications and Information Systems prepares managers and other professionals for the challenges of a changing business environment. This program includes a core of courses focusing on information technology applications, human-computer interfaces, and support software. In addition, students solve communications problems and develop information strategies for a variety of users and contexts. Shortly after beginning the program, students select a specific area of application relevant to their interests.
